GUIDE TO RESEARCH IN AIR POLLUTION

SECTION 1. INTRODUCTION

This Seventh Edition of the Guide to Research in Air Pollution was compiled by the Center for Air Environment Studies of The Pennsylvania State University for the National Air Pollution Control Administration. Covered in this document are projects that were active in Calendar Year 1969.

This Guide is divided into three parts:

1. A project list in which each domestic project is listed by state and each foreign project is listed by country.
2. A listing by subject.
3. A listing by name of the principal investigator.

Section 2 consists of the number assigned to the project, location and name of the performing research organization, project title, name of investigator and address, sponsor, and type of support.

Section 3 is a listing of projects by subject category and project number.

Section 4 contains the name of the principal investigator (when available), the project number, and titles of publications and presentations resulting from the project.

Because information contained herein was collected by means of questionnaire, neither The Pennsylvania State University nor the National Air Pollution Control Administration can assume any responsibility for validity or accuracy of information provided by the respondents.
